To whom it may concern

Dear Sir/Madam,

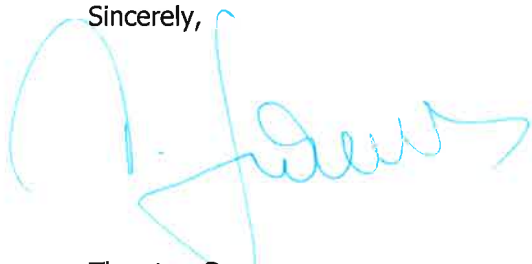

JAS Projects – Oil & Gas, a division of JAS Forwarding GmbH, has engaged MBM Consultancy from December 2015 to August 2017 as transport engineers covering our global requirements in relation to heavy and out of gauge transportation, loading- and unloading work.

Throughout the period of engagement, MBM Consultancy regularly carried out work involving various Engineers, Naval architects and Super cargos. Their scope of work included verifying and establishing of carrier's method statements and relevant technical calculations, supervision of actual cargo moves and consulting on technical options available.

MBM Consultancy was organized, efficient and willing to provide their services at short notice to get a particular task accomplished. Although MBM Consultancy's primary duties were to review engineering and logistic plans provided from 3rd parties, MBM Consultancy also assumed roles to provide consultancy solutions in the form of engineering calculations, advice, training/development via meetings, emails, and telephone discussions.

We therefore recommend MBM Consultancy as a potential supplier for the above services.

Sincerely,

Thorsten Grams
Director Business Dev. & Operations (Global)
